

B.Sc Computer Science

Effective from the year 2025 onwards

DEPARTMENT OF COMPUTER SCIENCE

Nallamuthu Gounder Mahalingam College

(Autonomous)

(Accredited by NAAC with A++ &

ISO 9001:2015 Certified Institution)

Re-Accredited by NAAC

Pollachi-642001

SYLLABUS

B. Sc. COMPUTER SCIENCE

BATCH 2025-2028

NGM COLLEGE

Vision

Our dream is to make the College an institution of excellence at the national level by imparting quality education of global standards to make students academically superior, socially committed, ethically strong, spiritually evolved and culturally rich citizens to contribute to the holistic development of the self and society.

Mission

Training students to become role models in academic arena by strengthening infrastructure, upgrading curriculum, developing faculty, augmenting extension services and imparting quality education through an enlightened management and committed faculty who ensure knowledge transfer, instill research aptitude and infuse ethical and cultural values to transform students into disciplined citizens in order to improve quality of life.

DEPARTMENT OF COMPUTER SCIENCE

Department Vision

Our vision is to make the department, a department of excellence at the international level by imparting need based Information Technology education of global industry standards to make students academically and technically sound, enriched with rich spiritual quotients, contribute to the overall development of the self, society and country.

Department Mission

Developing students to become role models as technocrats by imparting technical knowledge, recent curriculum in catering the needs of Information Technology industry and quality education through dedicated faculty and rejuvenate students into technically sound, in order to make globally fit and improve the standard of life.

Programme Educational Objectives(PEOs)	
The B.Sc. Computer Science programme describe accomplishments that graduates are expected to attain within five to seven years after graduation	
PEO1	To enrich knowledge in core areas related to the field of computer science and Mathematics.
PEO2	To provide opportunities for acquiring in-depth knowledge in Industry 4.0/5.0tools and techniques and there by design and implement software projects to meet customer's business objectives.
PEO3	To enable graduates to pursue higher education leading to Master and Research Degrees or have a successful career in industries associated with Computer Science or as entrepreneurs
PEO4	To enhance communicative skills and inculcate team spirit through professional activities, skills in handling complex problems in data analysis and research project to make them a better team player.
PEO5	To embed human values and professional ethics in the young minds and contribute towards nation building.

Programme Outcomes(POs)	
On successful completion of the B.Sc. Computer Science program	
PO1	Problem Solving: Demonstrate the aptitude of Computer Programming and Computer based problem solving skills.
PO2	Disciplinary Knowledge: Display the knowledge of appropriate theory, practices and tools for the specification, design and implementation.
PO3	Scientific reasoning/Problem analysis: Ability to link knowledge of Computer Science with other two chosen auxiliary disciplines of study.
PO4	Environment and sustainability: Understand the impact of software solutions in environmental and societal context and strive for sustainable development.
PO5	Modern tool usage: Use contemporary techniques, skills and digital tools necessary for integrated solutions.
PO6	Design Development Solution: Ability to formulate, to model, to design solutions, procedure and to use software tools to solve real world problems and evaluate
PO7	Ethics and Team Work: Ability to operate with Ethical Values as a member, leader and manage deploy in an organization
PO8	Communication Skills: An ability to communicate effectively with diverse types of audience and also able to prepare and present technical documents to different groups
PO9	Lifelong Learning and Self-directed learning: Ability to obtain knowledge and skills that are necessary for participating in learning activities throughout life.
PO10	Decision Making: Ability to apply decision making methodologies to evaluate solution for efficiency, effectiveness, and sustainability.

Programme Specific Outcomes(PSOs)	
After the successful completion of B.Sc. Computer Science program, the students are expected to	
PSO-01	Software Development: Design and develop computer programs/computer-based systems Development in the areas related to algorithms, languages, networking, web development, cloud computing, IoT and data analytics.
PSO-02	Education and Employment: Ability to pursue higher studies of specialization and to take up technical employment

B.Sc. – COMPUTER SCIENCE DEGREE COURSE**(FOR THE CANDIDATES ADMITTED FROM THE ACADEMIC YEAR 2025-2026 ONWARDS)****I to VI SEMESTERS****SCHEME OF EXAMINATIONS**

SEMESTER - I										
Part	Subject Code	Title of the Paper	Hrs/ Week		Hrs/ Sem	Exam Hrs.	Maximum Marks		Total Marks	Credits
			L	P	T		Internal	External		
I	25UTL1C1	Tamil Paper-I	5	-	-	3	25	75	100	3
	25UHN1C1	Hindi Paper-I								
	25UFR1C1	French Paper-I								
II	25UEN101	Communication Skills – I	5	-	-	3	25	75	100	3
III	25UCS101	CC I: C++ Programming	4	-	-	3	25	75	100	4
	25UCS102	CC II: Digital Computer Fundamentals and Organization	4	-	-	3	25	75	100	4
	25UCS1A1/ 25UCS1A2	GE I – Allied I: Mathematics: Statistical Methods & Linear Algebra / Advanced Mathematics and Applied Statistics	5	-	-	3	25	75	100	4
	25UCS103	CC Lab I: Programming Lab using C++	-	4	-	3	20	30	50	2
IV	25EVS101	AECC I: Environmental Studies	2	-	-	-	-	50	50	2
	25HEC101	Human Excellence: Personal Values & Indian Yoga Practice -I	1	-	-	2	20	30	50	1
V		Extension Activities – Annexure I	-	-	-	-	-	-	-	-
EC		Online Course (Optional) (MOOC / NPTEL / SWAYAM)	-	-	-	-	-	-	-	Grade
Total			30						650	23

EC – Extra Credit Course / Certificate Course / Co-scholastic Course / Job Oriented Course

CC – Core Course; GE – Generic Elective; AECC - Ability Enhancement Compulsory Course

NOTE:

1. Include at least one Indian Knowledge System (IKS) course that is relevant to department-specific and regional language teaching in the programme.
2. Include Project/Field visit/Internship compulsory component in curriculum.
3. Include Blended mode of teaching atleast one hour for a course and also minimum of two courses in a semester.

SEMESTER - II										
Part	Subject Code	Title of the Paper	Hrs. / Week		Hrs. / Sem.	Exam Hrs.	Maximum Marks		Total Marks	Credits
			L	P			Internal	External		
I	25UTL2C2	Tamil Paper-II	5	-	-	3	25	75	100	3
	25UHN2C2	Hindi Paper-II								
	25UFR2C2	French Paper-II								
II	25UEN202	Communication Skills – II	5	-	-	3	25	75	100	3
III	25UCS204	CC III: Java Programming	4	-	-	3	25	75	100	4
	25UCS205	CC IV: Data Communication and Computer Networks	4	-	-	3	25	75	100	4
	25UCS2A1 / 25UCS2A2	GE II – Allied II: Vedic and Discrete Mathematics / Discrete Mathematical Structures	5	-	-	3	25	75	100	4
	25UCS206	CC Lab II: Programming Lab using Java	-	4	-	3	20	30	50	2
IV	25UCS281 / 25UCS282	SEC I: Naan Mudhalvan : Business English Communications / Data Analysis using Excel Lab	-	2	-	3	-	50	50	2
	25HEC202	Human Excellence - Family Values & Indian Yoga Practice – II	1	-	-	2	20	30	50	1
V		Extension Activities - Annexure I	-	-	-	-	-	-	-	-
EC	25CMM201	IKS:Manariviyal Mahathuvam - I			15 Hrs.	2	-	50	50	Grade
	25CUB201	IKS:UzhavuBharatham - I			15 Hrs.	2	-	50	50	Grade
	25UCS2VA	VAC I: Digital Content Development Lab			30 Hrs.					2*
		Online Course (Optional) (MOOC / NPTEL / SWAYAM)								Grade
Total			30						650	23

EC – Extra Credit Course / Certificate Course / Co-scholastic Course / Job Oriented Course,
 CC – Core Course, GE – Generic Elective, AECC - Ability Enhancement Compulsory Course,
 SEC – Skill Enhancement Course, IKS – Indian Knowledge System

SEMESTER – III										
Part	Subject Code	Title of the Paper	Hrs. / Week		Hrs. / Sem.	Exam Hrs.	Maximum Marks		Total Marks	Credits
			L	P	T		Internal	External		
I	25UTL3C3	Tamil Paper-III	3	-	-	3	25	75	100	3
	25UHN3C3	Hindi Paper-III								
	25UFR3C3	French Paper-III								
II	25UEN3C3	Communication Skills – III	3	-	-	3	25	75	100	3
III	25UCS307	CC V: Data Structures	4	-	-	3	25	75	100	4
	25UCS308	CC VI: Operating System Concepts and Linux	4	-	-	3	25	75	100	4
	25UCS3A1 / 25UCS3A2	GE III – Allied III: Computer Based Optimization Techniques / Resource Management Techniques	5	-	-	3	25	75	100	4
	25UCS309	CC Lab III: Data Structures Lab	-	4	-	3	20	30	50	2
	25UCS310	CC Lab IV: Linux Programming Lab	-	4	-	3	20	30	50	2
IV	25UCS3N1 / 25UCS3N2	Non-Major Elective I: Multimedia Lab/ Advanced Applications in MS Excel Lab	-	2	-	2	-	50	50	2
	25HEC303	Human Excellence - Professional Values & Indian Yoga Practice – III	1	-	-	2	20	30	50	1
V	25UHW301	Health & Wellness	2*	-	-	-	100 Reduce to 25	-	25	1
EC	25CMM301	IKS: Manaiyiyal Mahathuvum - II			15 Hrs.	2	-	50	50	Grade
	25CUB302	IKS: Uzhavu Bharatham - II			15 Hrs.	2	-	50	50	Grade
Total			30						725	26

NOTE:

1. Offer skill-oriented courses as non-major elective courses.
 2. Health & Wellness (Single Credit) course of 30 Hrs. of activity which is outside of the Class hours. Credit of this course to be adjusted preferably in Part IV.
- # Outside class hours mandatory course with one Credits.

SEMESTER - IV										
Part	Subject Code	Title of the Paper	Hrs/ Week		Hrs. / Sem.	Exam Hrs	Maximum Marks		Total Marks	Credits
			L	P			Internal	External		
I	25UTL4C4	Tamil Paper-IV	3	-	-	3	25	75	100	3

Question Paper Pattern

(Based on Bloom's Taxonomy)

K1-Remember; K2- Understanding; K3- Apply; K4-Analyze; K5- Evaluate

1. Theory Examinations: 75 Marks (Part I, II, & III)

(i) Test-I & II, ESE:

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q1 - 10)	A (Q1 - 5 MCQ) (Q6 - 10 Define / Short Answer / MCQ)	$10 * 1 = 10$	MCQ / Define	75
K3 (Q11-15)	B (Either or pattern)	$5 * 5 = 25$	Short Answers	
K4 & K5 (Q16 - 20)	C (Either or pattern)	$5 * 8 = 40$	Descriptive/ Detailed	

2. Theory Examinations: 38 Marks (3 Hours Examination)

(Part III: If applicable)

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q1 - 10)	A (Q1 - 10 MCQ)	$10 * 1 = 10$	MCQ	50 (Reduced to 38)
K3 (Q11 - 15)	B (Either or pattern)	$5 * 3 = 15$	Short Answers	
K4 & K5 (Q16-20)	C (Either or pattern)	$5 * 5 = 25$	Descriptive/ Detailed	

3. Theory Examinations: 38 Marks (2 Hours Examination)

(Part IV: If applicable)

Knowledge Level	Section	Marks	Description	Total
K1 & K2 (Q1- 10)	A (Q1 - 5 MCQ) (Q6- 10 Define / Short Answer)	$10 * 1 = 10$	MCQ / Define	50 (Reduced to 38)
K3, K4 & K5 (Q11-15)	B (Either or pattern)	$5 * 8 = 40$	Descriptive/ Detailed	

4. Practical Examinations:

Paper	Maximum Marks	Marks for		Components for CIA		
		CIA	CEE	Tests	Observation Note	Record Note
Practical (Core / Elective)	50	20	30	10	05	05
Practical (Core / Elective)	75	30	45	20	05	05
Practical (Core / Elective)	100	40	60	30	05	05

5. Project:

Paper	Maximum Marks	Marks for		
		CIA	CEE	
			Evaluation	Viva-voce
Project	100	25	50	25
Project	150	40	75	35
Project	200	50	100	50

* CIA – Continuous Internal Assessment & CEE – Comprehensive External Examinations

Components of Continuous Internal Assessment (CIA)**THEORY****Maximum Marks: 100; CIA Mark: 25; CEE Mark: 75**

Components		Calculation	CIA Total
Test 1	75	$(75+75+15+10)/7$	25
Test 2 / Model	75		
Assignment / Digital Assignment	15		
Others*	10		

*Others may include the following: Seminar / Socratic-Seminar, Group Discussion, Role Play, APS, Class participation, Case Studies Presentation, Field Work, Field Survey, Term Paper, Workshop / Conference Participation, Presentation of Papers in Conferences, Quiz, Report / Content Writing, etc.

Maximum Marks: 50; CIA Mark: 12; CEE Mark: 38;
(Part III: If applicable)

Components		Calculation	CIA Total
Test 1	50	$(50+50+10+10)/7$	12
Test 2 / Model	50		
Assignment / Digital Assignment	10		
Seminar	10		

PROJECT**Maximum Marks: 100; CIA Mark: 25; CEE Mark: 75;**

Components		Calculation	CIA Total
Review I	5	5+5+5+10	25
Review II	5		
Review III	5		
Report Submission	10		

Maximum Marks: 200; CIA Mark: 50; CEE Mark: 150;

Components		Calculation	CIA Total
Review I	10	10+ 10+10+20	50
Review II	10		
Review III	10		
Report Submission	20		

* Components for 'Review' may include the following:

Originality of Idea, Relevance to Current Trend, Candidate Involvement, and Presentation of Report for Commerce, Management & Social Work.

Synopsis, System Planning, Design, Coding, Input form, Output format, Preparation of Report & Submission for Computer Science cluster.

Continuous Internal Assessment for Project

For Commerce, Management & Social Work Programme

The Final year Commerce, Management & Social Work students should undergo a project work during (V/VI) semester

- ❖ The period of study is for 4 weeks.
- ❖ Project / Internship work has to be done in an industrial organization (or) work on any industrial problem outside the organization is allowed.
- ❖ Students are divided into groups and each group is guided by a Mentor.
- ❖ The group should not exceed four students, also interested student can undergo individually.
- ❖ A problem is chosen, objectives are framed, and data is collected, analyzed and documented in the form of a report / Project.
- ❖ Viva – Voce is conducted at the end of this semester, by an External Examiner and concerned Mentor (Internal Examiner).
- ❖ Project work constitutes 100 marks, out of which 25 is CIA and 75 is CEE Marks.

Mark Split UP

CIA	CEE	Total
25	75	100

S. No	Components for CIA	Marks
1	Review – I *	5
2	Review – II *	5
3	Review – III *	5
4	Rough Draft Submission	10
Total		25

* Review includes Objectives and Scope, Research Methodology, Literature Review, Data Analysis and Results, Discussion and Interpretation, Recommendations and Implications, Presentation and Format, Creativity and Originality, and Overall Impact and Contribution.

S. No	Components for CEE	Marks
1	Evaluation*	50
2	Viva-Voce	25
Total		75

* Evaluation includes Originality of Ideas, Relevance to Current Trend, Candidate Involvement, Thesis Style / Language, and Presentation of Report.

Continuous Internal Assessment for Project

For Science Stream

The Final year Science students should undergo a project work during (V/VI) semester

- ❖ The period of study is for 4 weeks.
- ❖ Project / Internship work has to be done in an industrial organization (or) work on any industrial problem outside the organization is allowed.
- ❖ Students are divided into groups and each group is guided by a Mentor.
- ❖ The group should not exceed four students, also interested student can undergo individually.
- ❖ A problem is chosen, objectives are framed, and data is collected, analyzed and documented in the form of a report / Project.
- ❖ Viva – Voce is conducted at the end of this semester, by an External Examiner and concerned Mentor (Internal Examiner).
- ❖ Project work constitutes 200 marks, out of which 50 is CIA and 150 is CEE Marks.

Mark Split UP

CIA	CEE	Total
50	150	200

S. No	Components for CIA	Marks
1	Review – I *	10
2	Review – II *	10
3	Review – III *	10
4	Rough Draft Submission / Report Submission	20
Total		50

* Review I: - Problem Analysis

* Review II: - Data collection & Design

* Review III: - Data Analysis

S. No	Components for CEE	Marks
1	Evaluation *	100
2	Viva-Voce	50
Total		150

* Evaluation includes Problem and Hypothesis, Experimental Design / Materials / Procedure, Variables / Controls / Sample Size, and Data Collection / Analysis.

Continuous Internal Assessment for Project
For Computer Science Cluster

Maximum Marks: 100 Marks

Components for CIA: 25 Marks

Criteria	Mode of Evaluation	Marks	Total
I	Synopsis, Company Profile, System Specification, Existing System, Proposed System OR (For Android Developments) Planning Stage	05	25
II	Supporting Diagrams like system flowchart, ER, DFD, Usecase and Table Design OR UI and UX Design Application Architect and Prototyping	05

COMPUTER SCIENCE PROJECT and VIVA VOCE

Guidelines

Introduction

The title of the project work and the organization will be finalized at the end of the fifth Semester. Each student will be assigned with a Faculty for guidance. The Project work and coding will be carried by using the facility of the computer science lab as well as in the organization. The periodical review will be conducted to monitor the progress of the project work. The project report will be prepared and submitted at the end of the semester. An external examiner appointed by the Controller of Examination will conduct the viva voce examination along with a respective guide.

Area of Work

- Web Based Development
- Mobile app development
- Website development
- IoT Projects
- Big Data and Data Mining Projects
- Cloud Computing Projects
- Networking Projects
- Artificial Intelligence and Machine learning Projects
- Data Analytics Projects using Python, R, Tableau etc.
- System Software
- Web Security Projects
- Image Processing

Methodology

Arrangement of Contents:

The sequence in which the project report material should be arranged and bound is as follows:

1. Cover Page & Title Page
2. Bonafide Certificate
3. Declaration
4. Acknowledgements

5. Synopsis
6. Table of Contents
7. Chapters
8. Appendix
9. References

Format of Table of Contents

TABLE OF CONTENTS

8-10	5-7	3-4	0-2

CRITERIA	A - Excellent	B – Good	C - Average	D - Inadequate
Organization of presentation	Information presented as an interesting story in a logical, easy-to-follow sequence	Information presented in logical sequence; easy to follow	Most of the information is presented in sequence	Hard to follow; sequence of information jumpy
Knowledge of the subject & References	Demonstrated full knowledge; answered all questions with elaboration & Material sufficient for clear understanding AND exceptionally presented	At ease; answered all questions but failed to elaborate & Material sufficient for clear understanding AND effectively presented	At ease with information; answered most questions & Material sufficient for clear understanding but not clearly presented	Does not have a grasp of information; answered only rudimentary Questions & Material not clearly related to the topic OR background dominated seminar
Presentation Skills using ICT Tools	Uses graphics that explain and reinforce text and presentation	Uses graphics that explain the text and presentation	Uses graphics that relate to text and presentation	Uses graphics that rarely support text and presentation
Eye-Contact	Refers to slides to make points; engaged with the audience	Refers to slides to make points; eye contact the majority of the time	Refers to slides to make points; occasional eye contact	Reads most slides; no or just occasional eye contact
Elocution – (Ability to speak English language)	Correct, precise pronunciation of all terms The voice is clear and steady; the audience can hear well at all times	Incorrectly pronounces a few terms Voice is clear with few fluctuations; the audience can hear well most of the time	Incorrectly pronounces some terms Voice fluctuates from low to clear; difficult to hear at times	Mumbles and/or Incorrectly pronounces some terms Voice is low; difficult to hear

WRITTEN ASSIGNMENT RUBRIC

Grading Scale:

A	B	C	D	F
13-15	10-12	7-9	4-6	0-3

CRITERION	A - Excellent	B - Good	C - Average	D - Below Average	F - Inadequate
Content & Focus	Hits on almost all content exceptionally clear	Hits on most key points and the writing is interesting	Hits in basic content and writing are understandable	Hits on a portion of content and/or digressions and errors	Completely off track or did not submit
Sentence Structure & Style	• Word choice is rich and varies • Writing style is consistently strong • Students own formal language	• Word choice is clear and reasonably precise • Writing language is appropriate to the topic • Words convey intended message	• Word choice is basic • Most writing language is appropriate to the topic • Informal language	• Word choice is vague • Writing language is not appropriate to the topic • Message is unclear	• Not Adequate
Sources	Sources are cited and are used critically	Sources are cited and some are used critically	Some sources are missing	Sources are not cited	Sources are not at all cited
Neatness	Typed; Clean; Neatly bound in a report cover; illustrations provided	Legible writing, well-formed characters; Clean and neatly bound in a report cover	Legible writing, some ill-formed letters, print too small or too large; papers stapled together	Illegible writing; loose pages	Same as below standard
Timeliness	Report on time	Report one class period late	Report two class periods late	Report more than one week late	Report more than 10 days late

Programme Code:	B.Sc.		Programme Title:	Bachelor of Science (Computer Science)	
Course Code:	25UCS101		Course Title	Batch:	2025 - 2028
Lecture Hrs./Week or Practical Hrs./Week	4	Tutorial Hrs./Sem.	-	Semester:	I
			CCI: C++ Programming	Credits:	4

Course Objective

On successful completion of the course the students should understand all the features of C++ and make the students to apply the same for writing programming for solving problem

Course Outcomes

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To remember the basic OOPs concepts such as Class, Inheritance, Abstraction, Polymorphism, etc.	K1
CO2	To understand how C++ differentiates between object oriented programming and procedural programming and the use of function, operator overloading.	K2
CO3	To apply constructor & Destructors in performing and built programme using virtual functions.	K3
CO4	To implement programs using more advanced features such as composition of Objects, Operator overloads, Inheritance, Polymorphism, Dynamic memory allocation etc.	K4
CO5	To evaluate C++ programs using File IO, Command line arguments and Exception Handling.	K2,K5

Syllabus

Units	Content	Hrs
Unit I	Principles of Object Oriented Programming: Software Evolution – Procedure-Oriented Programming – Object-Oriented Programming Paradigm – Key Concepts of Object-Oriented Programming-Benefits of OOP-Object-Oriented Languages – Applications of OOP. Beginning with C++: Introduction – A Simple C++ Program – Output Operator –Input Operator-Cascading of I/O Operators – Structure of C++Program. Tokens, Expressions and Control Structures: Introduction– Tokens– Keywords– Identifiers and Constants–Basic Data Types– User-Defined Data Types–Derived Data Types – Symbolic Constants – Declaration of Variables – Dynamic Initialization of Variables–Reference Variables–Operators in C++–Scope Resolution Operator – Member Dereferencing Operators – Memory Management Operators – Manipulators – Type Cast Operator – Expressions and Their Types –Special Assignment Expressions – Implicit Conversions– Operator Precedence –Control Structures.	12
Unit II	Functions in C++: Introduction – The Main Function – Function Prototyping–Call by Reference – Return by Reference – Inline Functions – Default Arguments –const Arguments – Function Overloading – Friend and Virtual Functions – Math Library Functions. Classes and Objects: Introduction – C Structures Revisited – Specifying a Class – Defining Member Functions – Making an Outside Function Inline – Nesting of Member Functions – Private Member Functions – Arrays within a Class – Memory Allocation for Objects – Static Data Members – Static Member Functions – Array of Objects – Objects as Function Arguments – Friendly Functions– Returning Objects.	12
Unit III	Constructor and Destructor: Introduction – Constructors – Parameterized Constructors– Multiple Constructors in a Class–Dynamic Initialization of Objects Copy Constructor–Dynamic Constructors–Constructor with Default Arguments –Destructors. Operator Overloading and Type Conversions: Introduction – Defining Operator Overloading – Overloading Unary Operators – Overloading Binary Operators – Overloading Binary Operator Using Friends–Manipulation of Strings using Operators – Rules for Overloading Operators–Type Conversions.	12
Unit IV	Inheritance: Extending Classes: Introduction – Defining Derived Classes – Single Inheritance –Making a Private Member Inheritable–Multilevel Inheritance–Multiple Inheritance – Hierarchical Inheritance – Hybrid Inheritance – Virtual Base Classes – Abstract Classes – Constructors in Derived Classes – Member Classes: Nesting of Classes. Pointers, Virtual Functions and Polymorphism: Introduction–Pointers to Objects – this Pointer – Pointers to Derived classes – Virtual Functions –Pure Virtual Functions.	12

Unit V	Managing Console I/O Operations: Introduction – C++ Streams – C++ Stream Classes – Unformatted I/O Operations – Formatted Console I/O Operations – Managing Output with Manipulators. Working with Files: Introduction – Classes for File Stream Operations – Opening and Closing a File – Detecting End-of-File – More about Open(). File Modes – File Pointer and their Manipulations- Sequential Input and Output Operations-Updating a File: Random Access – Error Handling During File Operations –Command-Line Arguments. Exception Handling : Introduction- Basics of Exception Handling-Exception Handling Mechanism – Throwing and Catching Mechanism.	12
	Total Contact Hrs	60

Pedagogy and Assessment Methods:

Direct Instruction Digital Presentation, Digital Assignments, Seminar, Power Point Presentation, Online Quiz, Group Talk(APS).

LectureHrs./Week Or Practical Hrs./Week	4	Tutorial Hrs./Sem.	-	Fundamentals and Organization	Credits:	4

Course Objective

On completion of this course, the students can understand the design of combinational and sequential digital logic circuits. Students will also have knowledge on Programmable Logic devices and its usage.

Course Outcomes (CO)

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To recollect the fundamental concepts and techniques used in digital Electronics.	K1
CO2	To get the idea of basic postulates of Boolean Algebra and to apply the methods of simplifying Boolean expressions.	K2
CO3	To apply knowledge about internal circuitry and logic behind any digital system and to design various synchronous and asynchronous circuits.	K3
CO4	To identify the concept of memories, and to introduce micro controller case study.	K4
CO5	To analyze the usage of different kinds of Memory Management and mapping techniques.	K5

Lecture Hrs./Week or Practical Hrs./Week	5	Tutorial Hrs./Sem.	-	GE 1 – Allied I: Mathematics – Statistical Methods & Linear Algebra	Semester:	1
					Credits:	4

Course Objective

- To apply the computational aspects of basic statistical measures and applications of small and large samples in real life problems.
- To introduce the computational techniques and algebraic skills essential for the study of systems of linear equations and matrix algebra.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand the statistical formula and apply them in various data analysis	K3
CO2	Understand the concept of most powerful test and analyze the samples based on most powerful test like 't' and 'F' distributions	K4
CO3	Understand the concepts of probability and apply to solve real life situations	K3
CO4	Recognize the basic concepts of vectors, matrices and linear equations and examine its application in the modern science	K4
CO5	Apply the linear algebra techniques learned from determinants, differential equations to solve simple problems	K3

Programme Code:	B.Sc.			Programme Title:	Bachelor of Science (Computer Science)		
Course Code:	25UCS1A2			Course Title:	Batch:	2025 - 2028	
Lecture Hrs./Week or Practical Hrs./Week	5	Tutorial Hrs./Sem.	-	Allied-1: Advanced Mathematics and Applied Statistics	Semester:	1	
					Credits:	4	

Course Objective

- To apply the computational aspects of basic statistical measures and to enable the students to solve linear system of equations and integration using numerical methods.
- To present the concept of theoretical probability to acquire the knowledge of testing of small and large samples which plays an important role in real life problems.

Course Outcomes

On the successful completion of the course, students will be able

CO	CO Statement	Knowledge Level
CO1	Understand and analyze the statistical formula and apply the min various data analysis problems and Measure and interpret the degree of relationship between variables.	K4,K2
CO2	Apply the distributions to infer the behavior of observation in the sample space and also learn its moment generating function.	K4
CO3	Analyze the concept of most powerful test and analyze the samples based on most powerful test like T, F and chi-square.	K4
CO4	Understand the concepts of probability and apply to solve real life situations.	K3,K2
CO5	Evaluate numerical solutions of algebraic equations and compute the integrals by using the appropriate technique.	K5

Hrs/Week:	4	Tutorial - Hrs./Sem	CC Lab I-Programming Lab using C++	Semester:	1
				Credits:	2

Course Objective

The primary aim of C++ programming was to add object orientation to the C++ programming language and also to enhance problem solving and programming skills using OOPs concepts in various domains.

Course Outcomes (CO)

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To apply the basic concepts of C++ such as function, friend functions and array of objects to solve a particular problem.	K1
CO2	To analyze programs using more advanced OOPs concepts such as Constructor/Destructor, Operator overloading, Inheritance, and Polymorphism.	K4
CO3	To validate programs using Dynamic memory allocation and Virtual functions.	K5

Course Objective

The objective of this course is to make the students to understand the various features of Java such as Packages, Applets, AWT controls, Stream classes and Files and make the students to apply the same for writing the programs.

Course Outcomes

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To remember and understand the OOPs concept such as class, methods, inheritance, encapsulation and polymorphism, etc.	K1,K2
CO2	To understand the differences between application programs and applets, applet life cycle and graphics programming.	K2
CO3	To implement programs using Thread, Applet and AWT controls, Swings, Beans and Servlets	K3
CO4	To evaluate java programs using stream classes and files.	K4
CO5	To design webpage using Applets	K5

					Credits:	4

Course Objective

To enable the students to understand the concepts and principles of datacommunication and networking including topology, protocols, and types of networks along with concepts of the OSI reference model.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the basic concepts of Networks	K1
CO2	Get the idea on Connection-oriented and Connection-less networks	K2
CO3	Apply design principles and functionalities in OSI Reference Layers	K3
CO4	Analyze ISDN network, TCP/IP, etc.,	K4
CO5	Knowledge about different computer networks, reference models and the functions of each layer in the models	K5

Syllabus

Units	Contents	Hrs
Unit I	Introduction: Communications and Networking-Fundamental concepts-Data communications-Protocols-Standards-Signal Propagation-Analog and Digital Signals-Parallel and Serial Communications-Simplex, Half-duplex and Full-duplex communications-Multiplexing-Transmission errors-Detection and Correction. Error classification: Delay Distortion, Attenuation & Noise.Types of Errors: Single bit and Burst errors-Error Detection:VRC,LRC,CRC-Recovery from errors:Stop-and-Wait, Go-back-n.	12
Unit II	Transmission Media: Guided Media-Twisted Pair-Coaxial Cable-Optical Fiber-Unguided Media-Microwave Communication-Satellite Communication-FDMA, TDMA and CDMA. Network Topology: Mesh Topology-Star Topology-Tree Topology-Ring Topology-Bus Topology-Hybrid Topology. Switching and Routing: Switching basics-Circuit switching-Packet switching-Message switching-Router and Routing.	12
Unit III	Networking protocols and OSI Model: Protocols in Computer Communication – OSI Reference Models –Physical Layer-Data link Layer-Network Layer-Transport Layer-Session Layer-Presentation Layer-Application Layer.	12
Unit IV	Local Area Network (LAN)-Ethernet-Ethernet properties- CSMA/CD –Metropolitan Area Network (MAN) – Distributed Queue Dual Bus (DQDB) –Switched Multimegabit Data Services(SMDS)-Wide Area Network(WAN)-WAN Architecture.	12
Unit V	Integrated Services Digital Network (ISDN)-ISDN Architecture-ISDN Interfaces-X.25 Protocol-Understanding and Working of X.25protocol. TCP/IP: An Introduction to TCP/IP- TCP/IP Basics- IP/LogicalAddresses- TCP/IP Example-ARP-RARP.	12

Course Objective

On successful completion of the course, students will be able to understand and apply Vedic mathematics techniques for arithmetic operations and algebraic structures, grasp fundamental principles of mathematical logic and functions, analyze types and properties of relations, and effectively utilize graph theory concepts and algorithms to solve practical problems in various fields

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the Fundamental Techniques and Notation of Vedic Mathematics, including Methods For Addition, Subtraction, and Squaring.	K1
CO2	Understand and Explain the Principles of Mathematical Logic, including Propositions, Connectives, and Normal Forms.	K2
CO3	Apply Vedic Methods For Complex Arithmetic Operations In Real-Life Scenarios.	K3
CO4	Analyze Various Types of Functions And Relations, including their Compositions and Properties.	K4
CO5	Synthesize Knowledge of Algebraic Structures And Graph Theory to Solve Complex Problems, including those involving Semigroups, Monoids, and Graph Algorithms.	K5

Syllabus

Units	CONTENTS	Hours
Unit I	Vedic Mathematics - What is Vedic Mathematics? - Use of Vedic Mathematics - Addition - Vedic Method for Addition - Completion of a base number in the multiple of 10- pair of numbers doesn't form a base (multiple of 10) and one more than the previous one - Subtraction - Nikhilam Navatashcharamam Dashatam (All from 9 and last from 10)- Digit Separator Method for Subtraction - Square - Cube .	14
Unit II	Multiplication - Vedic Multiplication - All from 9 and last from 10-to proportionately - one less than the previous - the sum of unit and ten's digit at multiplicand and multiplier is 100 - Sum of left two digits is equal to 10 - process of vertical and cross-wise multiplication. Division -Introduction - Nikhilam(All from nine and last from 10) - Transpose and Apply -Division by UrdhvaTiryag and Dhvajanka(straight division) method	16
Unit III	Mathematical logic : Propositions - Connectives-Tautology and contradiction - Equivalence of Propositions -Duality law - Algebra of Propositions - Tautological Implications -Normal forms-Disjunctive and Conjunctive Normal Forms -PDNF -PCNF-Worked examples-Predicate Calculus-Quantifiers-Free and bound variables (Definitions only). Functions :Representation of function-Types of function-Composition of functions-Inverse of functions-Worked Examples.	15
Unit IV	Relations :Types of Relations- Some Operation of Relations -Composition of Relations - Properties of Relations -Equivalence Classes-Matrix Representation of Relation-Hasse diagrams for partial ordering- Terminology related to posets-Worked Examples. Algebraic Systems :Definitions - Properties of Algebraic Systems - Semi groups & Monoids - Homomorphism of Semigroups and Monoids- Properties of Homomorphism - Subsemigroups and Submonoids- Groups	16
Unit V	Graph Theory : Graph - Basic Definitions -Degree of a Vertex - Some Special Simple Graphs-Matrix Representation of Graphs-Paths, Cycles and Connectivity-Eulerian Graphs - Hamiltonian graphs- Connectedness in Directed Graphs- Shortest path algorithm-Dijkstra's Algorithm-Worked Examples.	14
Total Hours		75

					Credits:	2

Course Objective

The objective of this course is to make the students to implement various features of Java programming by using Java SDK environment to create, debug and run Java programs.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	To apply the basic concepts of Java such as class, methods, constructors, arrays and interfaces to solve the problems.	K3
CO2	To analyze programs using method overloading, method overriding, packages and threads.	K4
CO3	To validate programs using event handling, applets, AWT controls and files.	K5

Hrs/Week:	2	Tutorial Hrs./Sem.	SEC I: Niran Mudhalvan : Data Analysis using Excel Lab	Semester:	II
				Credits:	2

Course Objective

The main objectives are to construct formulas, including the use of built-in functions and relative and absolute references; convert text and validate; consolidate data; and create pivot tables and charts.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Develop organized data format using sorting and filtering components	K3
CO2	Design advanced graphic presentations on stored data	K4
CO3	Sort, search, and extract knowledge from historical data	K5

Mapping

H-High; M-Medium; L-Low

Content	Hours
• Getting Started with Excel: Creation of spread sheets, Insertion of rows and columns, Drag & Fill, use of Aggregate functions. • Working with Data: Importing data, Data Entry & Manipulation, Sorting & Filtering • Working with Data: Data Validation, Pivot Tables & Pivot Charts. • Data Analysis Process: Conditional Formatting, What-If Analysis, Data Tables, Charts & Graphs • Cleaning Data with Text Functions: use of UPPER and LOWER, TRIM function, Concatenate. • Cleaning Data Containing Date and Time Values: use of DATEVALUE function, DATEADD and DATEDIF, TIMEVALUE functions.	30

- **Conditional Formatting:** formatting, parsing, and highlighting data in spreadsheets during data analysis.
- **Working with Multiple Sheets:** work with multiple sheets within a workbook is crucial for organizing and managing data, perform complex calculations and create comprehensive reports.
- **Create worksheet with following fields:** Empno, Ename, Basic Pay(BP), Travelling Allowance(TA), Dearness Allowance(DA), House Rent Allowance(HRA), Income Tax(IT), Provident Fund(PF), Net Pay(NP). Use appropriate formulas to calculate the above scenario. Analyse the data using appropriate chart and report the data
- **Create worksheet on Sales analysis of Merchandise Store:** data consisting of Order ID, Customer ID, Gender, age, and date of order, month, online platform, Category of product, size, quantity, amount, shipping city and other details. Use of formula to segregate different categories and perform a comparative study using pivot tables and different sort of charts.
- **Generation of report & presentation using Auto filter & macro.**

Course Objective

On successful completion of the course the students are able to understand the concepts of array, stack, queue, list, linked list, tree, graph theory, searching and sorting.

Course Outcomes (CO)

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To keep in mind the basic static and dynamic data structures and relevant standard algorithms for them.	K1
CO2	To get the idea about advantages and disadvantages of specific algorithms and data structures.	K2
CO3	To implement new solutions for programming problems or improve existing code using learned algorithms and data structures.	K3
CO4	To evaluate algorithms and data structures in terms of time and memory complexity of basic operations.	K4
CO5	To analyze storage device types and indexing techniques	K5

Programme Code:	B.Sc.			Programme Title:	Bachelor of Science (Computer Science)		
Course Code:	25UCS308			Title	Batch:	2025 - 2028	
				CC VI: Operating System Concepts and Linux	Semester:	III	
LectureHrs./Week	4	Tutorial Hrs./Sem	-		Credits:	4	

Course Objective

Understand the fundamental concepts of operating systems, including process management, memory management, and virtual storage management and also learn about the different storage management strategies, job and processor scheduling algorithms

Understand the basics of Linux, including the GNU Project and the Free Software Foundation, shell programming, and Linux commands and Gain knowledge of processes, threads, and interprocess communication and file system permissions.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Develop a solid understanding of operating system fundamentals, including process concepts, process states and transitions, operations on processes, interrupt processing, and real storage management strategies	K1
CO2	Understands the use of different process scheduling algorithm and virtual storage techniques	K2
CO3	Apply the concept of Disk Performance Optimization to improve system performance and can be effectively navigate and utilize the Linux environment for various tasks	K3
CO4	Design, develop, and manage processes and threads, enable to build robust and efficient software systems.	K4
CO5	Evaluate the different methods of interprocess communication and implement secure communication and access control mechanisms in software systems.	K5

Syllabus

Units	Content	Hrs
Unit I	OPERATING SYSTEM: Introduction to Operating System – Process Concepts: Definition of Process - Process States - Process States Transition Operations on Processes – Interrupt Processing. Storage Management: Real Storage: Real Storage Management Strategies – Contiguous versus Non-contiguous storage allocation–Single User Contiguous Storage allocation–Fixed partition multi programming–Variable partition multi programming.	12
Unit II	Virtual Storage: Basic Concepts – Virtual Storage Management Strategies–Page Replacement Strategies – Working Sets–Demand Paging–Page Size. Processor Management: Job and Processor Scheduling: Scheduling Levels - Preemptive Vs Non-preemptive scheduling–Priorities –Deadline scheduling – FIFO - Round Robin – Shortest Job First – Shortest Remaining Time – Highest Response Ratio Next Scheduling.	12
Unit III	Disk Performance Optimization: Operation of moving head disk storage – Need for disk scheduling – Seek Optimization. LINUX: What Is Linux? - The GNU Project and the Free Software Foundation - Shell Programming: What Is a Shell? - Shell as a Programming Language – Linux Commands: Basic Commands – File Permission Commands – Environmental Variable Commands – Vi Editing commands – User Management Commands – Network Commands – Process Commands.	12
Unit IV	Processes: Looking at Processes - Creating Processes – Signals - Process Termination – Threads: Thread Creation - Thread Cancellation - Synchronization and Critical Sections - GNU/Linux Thread Implementation - Processes Vs. Threads	12
Unit V	Interprocess Communication: Introduction - Shared Memory - Processes Semaphores - Mapped Memory – Pipes – Sockets – Security: Users and Groups - Process User IDs and Process Group IDs - File System Permissions.	12

Lecture Hrs/Week:	5	Tutorial Hrs/Sem.	-	GE-III – Allied III: Computer Based Optimization Techniques	Semester:	III
					Credits:	4

Course Objective

To enable the students to understand and to apply the resource management techniques available in OR including linear programming, transportation, assignment problem, inventory control, queuing theory and network problems.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember and understand the concepts of relations	K1, K2
CO2	Understand the concept of transportation, networking, replacement, etc.,	K2
CO3	Apply the appropriate optimization techniques to solve the computer based business problems	K3, K5
CO4	Become familiar with: LPP, Hungarian method, Game theory, Replacement problem.	K4, K5
CO5	Analyze the ability of critical thinking, to find shortest time duration	K5

Syllabus

Units	Contents	Hrs
Unit I	Origin and development of OR-Applications of OR-Linear programming problem-Mathematical formulation of the problem-Graphical Method-Simplex Method.	15
Unit II	Transportation Problem: Balanced Transportation problem and Un-Balanced Transportation problem- Row- Minimum-Column Minimum-North-West Corner-Matrix Minima Method-Vogel's Approximation Method-U-V Method for OEP-E.	15

	Assignment Problem: Balanced Assignment Problem and Un-Balanced Assignment Problem–Hungarian Method.	
Unit III	Network Scheduling: Network and Basic components–Logical sequencing: Formation of a Loop, Dangling, Redundancy–Network Construction–Rules of Network construction–Time calculation in Network–Numbering the events–Critical Path Method (CPM)–PERT Calculations.	15
Unit IV	Replacement Problem and System Reliability: Model 1: Value of Money doesn't change with time. Model 2: Value of Money change with time. Game and Strategies: Introduction–Two-Person Zero-Sum games–Pure Strategies: Maximin–Minimax Principles–Saddle Point and Value of the Game–Rule for Determining a Saddle Point– Mixed Strategies: Games without Saddle Points– 2x2 Rectangular Games.	15
Unit V	Sequencing Problem: Problems with 'n' jobs and 2 machines–Problems with 'n' jobs and 'k' machines. Inventory control: Types of inventory – Economic Order Quantity: Model 1: EOQ problem with no shortages. Model 2: EOQ problem with no shortages and several production runs of unequal length. Model 3: EOQ problem with shortages.	15

Course Objective

To enhance the students' knowledge in decision analysis, sequencing of the jobs to be carried out based on cost optimization, replacement policies and analyze the cases according to their categories.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Know the principles and applications of information theory	K1,K2
CO2	To understand sequencing, replacement problems.	K2
CO3	Demonstrate skills to achieve their objective using sequencing models.	K3,K5
CO4	Apply decision making under different business environments.	K4,K5
CO5	Determine a solution to a rectangular game using simplex method	K5

Hrs/Week:	4		Credits:	2

Course Objective

The objective of this course is to make the students to write and execute programs using data structures such as arrays, linked lists, stacks, queues, trees and binary search trees, and also to implement various sorting and searching algorithms.

Course Outcomes (CO)

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To apply the data structures such as stacks, queues and trees to solve various computing problems	K3
CO2	To analyze various tree traversals in a binary search tree	K4
CO3	To validate various kinds of searching and sorting techniques	K5

		Non-Major Elective I: Multimedia Lab	Semester:	III
Practical Hrs/Week:	2		Credits:	2

Course Objective

The objective of this course is to make the students to gain a working knowledge of Photoshop and develop their skills in editing and altering photographs for through a basic understanding of the toolbar, layers and the adjustments panel.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	To apply the different type of tools available in Photoshop to create simple applications.	K3
CO2	To interpret programs using various filters in Photoshop	K4
CO3	To identify the basic tools and components of multimedia	K3

Syllabus

Units	Contents	Hrs
	SET A - Image Menu using Photoshop - Reduce Picture Size using Photoshop - Replace color in an image using Photoshop - Make a simple book cover by using basic functionalities using Photoshop - Transfer an object from one image to another and erase background using Photoshop - Add a pattern as background using Photoshop SET B - Create India Map using Photoshop - Retouching photos using Photoshop - Take a logo and modify it using Photoshop - Alter an image using filters using Photoshop - Special Effects-Color in black and white image using Photoshop	30

	Special Effects-Feathered Portraits (Softfade) using Photoshop EXTERNAL MARK (50 Marks)

Practical Hrs/Week:	2	Non-Major Elective I: Advanced Applications in MS Excel Lab	Semester:	III
			Credits:	2

Course Objective

This course was designed for the intermediate student who has already mastered the basic skills and wants to gain more advanced excel skills to put to work in a business environment or for personal use.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand and apply formulas and functions	K3
CO2	Develop professional -looking worksheets using formatting tools.	K4
CO5	Work with multiple worksheets and workbooks.	K5

Syllabus

Contents	Hrs
SET A - In a new worksheet, create a table and insert information of student details. Use features of Format Menu. - Create employee table and calculate the salary. Use mathematical functions for the worksheet. - Create own templates in Excel. - Create and use data validation rules. - Create, manage, and format pivot tables and pivot charts. - Create a data and use sum if and count if formulas SET B - Create and write complex formulas. - Create and use IF statements. - Apply custom and prebuilt conditional formatting. - Work with functions to manipulate strings of text and data. - Create charts in excel - Create a data and using that data perform Match and index - Create a data and using that data per form Vlookup concept	30

				CC VII: Python Programming	Semester:	IV
Lecture Hrs./Week	4	Tutorial Hrs./Sem.	4		Credits:	3

Course Objective

On successful completion of this course the students should understand the core principles of the Python Language and use the tools to produce well designed programs in python and create effective GUI applications.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the principles of structured programming and to understand basics of python.	K1
CO2	Understand the common programming idioms: variables, loop, branch, subroutine and input/output	K2
CO3	Deploy the concepts of functions, standard libraries, modular programming and the design of user interfaces	K3
CO4	Figure out ability to analyze and solve the problems using advanced facilities of the Python Language	K4
CO5	Evaluate the object oriented features in python using functions and standard libraries.	K5

			CC VIII: Relational Database Management Systems	Semester:	IV
Lecture Hrs/Week:	4	Tutorial Hrs./ Sem.	-	Credits:	3

Course Objective

The objective of this course is to make the students to understand and apply the principles of data modeling using Entity Relationship and normalization techniques and understand the use of Structured Query Language (SQL) and its syntax.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the basic concepts and applications of database systems and SQL.	K1
CO2	Understand the relational database theory, and be able to write relational algebra expressions for queries.	K2
CO3	Apply design principles using the E-R method and normalization approach.	K3
CO4	Interpret SQL, interface of a relational DBMS package to create, secure, populate, maintain, and query a database and PL/SQL programming using Triggers and Cursors.	K4
CO5	Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML)	K5

Units	Content	Hrs
Unit I	Database Concepts: A Relational Approach: An Introduction- Relationships- Database Management System- The Relational Database Model- Integrity Rules- Theoretical Relational Languages – Relational Algebra, Applications of Relational Algebra, Relational Calculus. Database Design: Data Modeling – Dependency – Database Design – Entity – Relationship Model- DFD Diagrams- Codd's Rules for RDBMS.	12
Unit II	Normalization: Normal Forms (1NF, 2NF, 3NF, BCNF, 4NF) – Dependency Diagrams – Denormalization. OracleSQL: Personal Databases- Client/Server Databases – Structured Query Language (SQL) - SQL*Plus Commands. Oracle Table: Data Definition Language (DDL): Naming rules and conventions- Data Types- Constraints – Creating an Oracle Table – Displaying Table Information - Altering, Dropping, Renaming a Table – Truncating a Table.	12
Unit III	Working with Table: Data Management and Retrieval: DML - Adding a new Row/ Record – Customized Prompts – Updating and Deleting an existing Rows/ Records – Retrieving data from table – Arithmetic Operations – restricting data with WHERE Clause – Sorting – Revisiting substitution variables – DEFINE Command – CASE structure. Functions and Grouping: Built-in functions – Grouping Data.	12
Unit IV	Multiple Tables: Joins and Set Operations: Join – Set Operations. PL/SQL: Introduction – Block Structure – Comments – Data types – Other data types – Declaration – Assignment Operators. Control Structures and Embedded SQL: Control Structures- Nested Blocks- SQL in PL/SQL – Data Manipulation – Transaction Control Statements.	12
Unit V	PL/SQL Cursors and Exceptions: Cursors – Implicit & Explicit Cursors and Attributes – Cursor FOR Loops – SELECT...FOR UPDATE – WHERE CURRENT OF Clause – Cursor with parameters – Cursor Variables – Exceptions- Types of Exceptions. PL/SQL Composite Data Types: Records – Tables – Arrays. Named Blocks: Procedures – Functions – Packages – Triggers- Data Dictionary Views.	12
	Total Contact Hrs	60

Pedagogy and Assessment Methods:

Seminar, Power Point Presentation, Chalk and talk, Quiz, Assignments, Group Task.

Programme code:	B.Sc	Programme Title:	Bachelor of Science (Computer Science)	
Course Code:	25UCS4N2	Course Title:	Batch:	2025-2028
Hrs/Week:	2	Non-Major Elective Paper-II: Internet Services and Applications Lab	Semester:	IV
			Credits:	2

Course Objective

To enable the students to know how to work with Internet, the usage of Internet and its applications.

Course Outcomes

On the successful completion of the course, students will be able-

CO Number	CO Statement	Knowledge Level
CO1	To know about basic of internet	K3
CO2	To analyze the concept through online.	K4
CO3	To get idea about online applications.	K5

Syllabus

Contents	Hrs
SET A - Download a information about "Power of Indian president" from a website by using a search engine. - Select two electronics items by e-shopping. - Select mobile phone items by e-shopping. - Book Online train Tickets from Coimbatore to Chennai. - Using Search Engine download information on "Benefits of Yoga". - Open an email account in your names in gmail/yahoomail/hotmail. - Write e-mail to Pradeep by marking a blind copy to Priya. - Download information about "greatness of Himalayas for tourism interest" in Powerpoint presentation. - Create an electronic greeting card with personal remarks and pictures. - Create an album edited by using online photo editor tools. - Create a questions and post it to any online evaluation tool to conduct a test. - Download information about greatness of Himalayas for tourism interest.	30
SET B - Write a congratulating letter to your friend on his promotion using mail. - Download research articles on "Information technology Applications" and save as doc. Files. - Download MPhil application form in Bharathiar university - Search the information about " PowerPoint creation" in youtube - Download pdf about the concept of "Environmental studies". - Convert word to pdf and pdf to word using online converter.	

- Pay EB-Bill through online
- Create a new video using online video editing tools

Course Code:	25UCS4VA	Course Title:	Batch:	2025-2028
		VAC II: Introduction to 3D Modeling and UI Design Lab	Semester:	IV
Hrs/semester:	30		Credits:	2*

Course Objective

To introduce the concepts of 3D Modeling and UI Design

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Apply the concept of 3D modeling	K3
CO2	Analyze the concepts of UI	K4
CO3	Evaluate program in incorporating all the User Interface.	K5

Syllabus

Contents	Hrs
SET A: 3D Modeling (Tinkercad) - Create a simple scene using basic shapes - Create a sphere and duplicate it to make different-sized balls. Change their colors and experiment with placements. - Create a cylinder-shaped pencil holder. Make it hollow by using the hole tool with a smaller cylinder inside. - Design a coffee mug with a hollowed-out interior and a handle. - Create a pyramid using wedge shapes. Rotate and align them to form a 4-sided pyramid structure.	30
SET B UI Design (Figma) - Design a call-to-action button for a mobile or web application - Create a user login form for a mobile or web application - Build a Navigation Bar for a mobile application - Design a landing page header section for a modern website - Create a to-do list UI that allows users to add and check off tasks.	

B.Sc. Computer Science

					Credits:	4

Course Objective

On successful completion of the course the students should understand features and applications of HTML, DHTML, Apache, MySQL & PHP

Course Outcomes (CO)

CO Number	CO Statement	Knowledge Level
CO1	Understand HTML tags for designing static pages and separate design from content using Cascading Style sheet	K1
CO2	Gain knowledge on basic MySQL commands	K2
CO3	Apply MYSQL commands to create and connect PHP application	K3
CO4	Examine basic PHP syntax for variables types, operators and flow controls	K4
CO5	Evaluate application accessing restrictions, logging and monitoring Apache web server activity, optimizing and tuning MySQL	K5

Syllabus

Units	Contents	Hrs
Unit I	HTML: Introduction-SGML-DTD-DTD Elements-Attributes-Outlines of and HTML document- HEADSECTION-Prologue-Link-Basis-Meta-Script-Style-BODY SECTION-Headers-paragraphs- Text Formatting-Linking-Embedding Images-Lists- Tables-Frames-Other Special Tags and Characters-HTML Forms. Dynamic HTML (DHTML): Introduction-Cascading Style Sheet (CSS)-Coding CSS. Properties of Tags-Property Values-Other Style Properties-Inline Style Sheets- Embedded Style Sheets-External Style Sheets-Grouping-Inheritance.	15
Unit II	MySQL: Introduction to MYSQL - The Show Databases and Table - The USE command - Create Database and Tables - Describe Table - Select, Insert, Update, and Delete statement - Some Administrative detail - Table Joins - Loading and Dumping a Database. Using Transactions and Stored Procedures in MySQL: What Are Transactions? What are Stored Procedures?-Interacting with MySQL Using PHP - MySQL or MySQLite Functions? Connecting to MySQL with PHP - Working with MySQL Data.	15
Unit III	PHP: Introduction-PHP Syntax-Variables-Data Types- String Functions-Constants- PHP Operators-Arithmetic Operators, Assignment Operators, String Operators, Increment/Decrement Operator- Comparison Operator- Logical Operator - Array Operators- if-else-elseif- Switch- While loop-for loop.	15
Unit IV	PHP Arrays-Sorting Arrays-PHP Global Variables-PHP Forms-Form handling-Form Validation- Form required field- PHP Functions-PHP Files: Opening and Closing files-Reading and Writing a file.	15
Unit V	APACHE: Introduction - Apache Explained - Starting, Stopping, and Restarting Apache - Modifying the Default Configuration - Securing Apache - Set User and Group - Consider Allowing Access to Local Documentation - Don't Allow public_html Web sites - Apache control with .htaccess	15

Course Code:	251/CS516			Course Title	Batch:	2025 - 2028
Lecture Hrs./Week	5	Tutorial Hrs./Sem.	-	CC X/Cyber Security	Semester:	V
					Credits:	4

Course Objective

This course provides students with concepts of computer security, cryptography, digital money, secure protocols, detection and other security techniques. Upon the completion of this course, students should be able to understand, appreciate, employ, design and implement appropriate security technologies and policies to protect computers and digital information.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Evaluate the computer network and information security needs of an organization.	K5
CO2	Assess cyber security risk management policies in order to adequately protect an organization's critical information and assets.	K2
CO3	Troubleshoot, maintain and update an enterprise-level information security system.	K3
CO4	Implement continuous network monitoring and provide real-time security solutions.	K4
CO5	Formulate, update and communicate short- and long-term organizational cyber security strategies and policies.	K5

Syllabus

Units	Contents	Hrs
Unit I	Introduction: Why Network Security is needed – Management principles – Security principles - Network management - Security attacks – Qualities of a Good Network, Organizational Policy and Security: Security policies, Standards and Guidelines – Information Policy – Security Policy - Physical Security – Social Engineering – Security Procedures – Building a Security Plan, Security Infrastructure: Infrastructure Components – Goals of Security Infrastructure – Design Guidelines – Security Models	15
Unit II	Cryptography: Terminology and background – Data Encryption Methods – Cryptographic Algorithms- Secret Key Cryptography - Public key cryptography – Message Digest – Security Mechanisms, Database Security: Introduction to Database – Characteristics of a Database Approach – Database Security Issues - Database Security – Vendor- Specific Security – Data Warehouse Control and Security	15
Unit III	Intrusion Detection Systems: What is not an IDS – Infrastructure of IDS – Classification of Intrusion Detection Systems – Host-Based IDS – Network-Based IDS - Anomaly Vs Signature Detection – Manage an IDS – Intrusion Detection Tools – IDS Products and Vendors, Network Security: Fundamental Concepts – Identification and Authentication – Access Control – A Model for Network Security – Malicious Software – Firewalls	15
Unit IV	Network Management: Goal of Network Management – Network Management Standards – Network Management Model – Infrastructure for Network Management - Simple Network Management Protocol (SNMP), Security Management: Security Plan - Security Analysis - Change Management - Systems Security Management - Protecting Storage Media- Exchanges of Information and Software – Security Requirements of Systems.	15
Unit V	Electronic Mail Policy: Electronic Mail – What are the E-mail threats that organization's face - Why do you need an E-mail Policy - How do you create an E-mail Policy - Publishing the E-mail Policy - University E-mail Policy, Security of Internet Banking Systems: Introduction Banking System – Security Problem – Methodology for Security Problem – Schematic flow of Internet Banking – A layered approach to security.	15

Course Objective

On successful completion of the course the students are able to understand the concepts of problemsolving logics, reasoning knowledge, Decision making, Learning with searches and algorithms.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	To recall the basic logical searches, learning algorithms and improve decision makingsystems.	K1
CO2	To Summarize the idea about knowledge representation and reasoning	K2
CO3	To illustrate new knowledge with probabilistic reasoning solutions	K3
CO4	To Analyze Decision making system and its different process	K4
CO5	To evaluate the learning skills with many observations und machine learning algorithms	K5

					Credits:	4

Course Objective

This course will introduce the concepts of data ware house and data mining, which gives a complete description about the principles, used, architectures, applications, design and implementation of data mining and data ware housing concepts.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Be familiar with the basics of data mining and data warehousing	K1
CO2	Develop skill in selecting the appropriate data mining algorithm for solving practical problems	K2
CO3	Characterize the kinds of patterns that can be discovered by classification, decision tree and neural network	K3
CO4	Identify the master data mining techniques in clustering	K4
CO5	Understand and implement classical models and algorithms in data warehouses and data mining	K5

Syllabus

Units	Contents	Hrs
Unit I	Selecting the appropriate storage technologies: Mapping storage systems to business requirements-Data modeling-Tradeoffs involving latency-throughput, transactions-Distributed systems-Schema design. Designing data pipelines: Data publishing and visualization-Batch and streaming data-Online vs. batch predictions Job automation and orchestration. Designing a data processing solution: Choice of infrastructure System availability and fault tolerance-Use of distributed systems-Capacity planning. Hybrid cloud and edge computing- Architecture options-event processing. Migrating data warehousing and data processing: Awareness of current	15

	state and how to migrate a design to a future state migrating from on-premises to cloud validating a migration.	
Unit II	Building and operationalizing storage systems: Effective use of managed services (Cloud Bigtable, Cloud Spanner, Cloud SQL, BigQuery, Cloud Storage, Cloud Datastore, Cloud Memorystore)-Storage costs and performance-Lifecycle management of data. Building and operationalizing pipelines: Data cleansing Batch and streaming-Transformation Data acquisition and import integrating with new data sources. Building and operationalizing processing infrastructure: Provisioning resources Monitoring pipelines Adjusting pipelines testing and quality control.	15
Unit III	Operationalizing machine learning models: Leveraging pre-built ML models as a service ML APIs (e.g., Vision API, Speech API)-Customizing ML APIs (e.g., AutoML Vision, Auto ML text) Conversational experiences (e.g., Dialogflow) Deploying an ML pipeline ingesting appropriate data retraining of machine learning models (Cloud Machine Learning Engine, BigQuery ML, Kubeflow, and Spark ML) Continuous evaluation. Choosing the appropriate training and serving infrastructure: Distributed vs. single machine Use of edge compute Hardware accelerators (e.g., GPU, TPU).	15
Unit IV	Measuring, monitoring, and troubleshooting machine learning models: Machine learning terminology (e.g., features, labels, models, regression, classification, recommendation, supervised and unsupervised learning, evaluation metrics)-Impact of dependencies of machine learning models Common sources of error (e.g., assumptions about data) Designing for security and compliance: Identity and access management (e.g., Cloud IAM)-Data security (encryption, key management)- Ensuring privacy (e.g., Data Loss Prevention API) Legal compliance (e.g., Health - Insurance Portability and Accountability Act (HIPAA)-Children's Online Privacy Protection Act (COPPA)-FedRAMP-General Data Protection Regulation (GDPR))	15
Unit V	Ensuring scalability and efficiency: Building and running test suites Pipeline monitoring (e.g., Stackdriver)-Assessing-troubleshooting and improving data representations and data processing infrastructure-Resizing and autoscaling resources Ensuring reliability and fidelity: Performing data preparation and quality control (e.g., Cloud Dataprep)-Verification and monitoring Planning, executing, and stress testing data recovery (fault tolerance, rerunning failed jobs, performing retrospective re-analysis)-Choosing between ACID, idempotent, eventually consistent requirements Ensuring flexibility and portability: Mapping to current and future business requirements-Designing for data and application portability (e.g., multi-cloud, data residency requirements) -Data staging-cataloging and discovery.	15

Course Code:	25UC55E3			Course Title	Batch:	2025 - 2028	
LectureHrs./Week	5	Tutorial Hrs./Sem.	-	DSE 1: Block Chain technology	Semester:	V	
					Credits:	4	

Course Objective

To impart knowledge on Block chain and Cryptocurrency and make the students to design, build and deploy distributed applications by integrating the ideas from Block chain technology.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the basics of Cryptography.	K1
CO2	Understand emerging abstract models for Block chain technology	K2
CO3	Design, build, and deploy a distributed application.	K3
CO4	Analyze the differences between proof-of-work and proof-of-stake consensus.	K4
CO5	Evaluate security, privacy, and efficiency of a Block chain system.	K5

Units	Contents	Hrs
Unit I	Introducing Blockchain: Beginning at the Beginning: What Blockchains Are - What blockchains do - Why blockchains matter - The Structure of Blockchains - Blockchain Applications - The Blockchain Life Cycle. Picking a Blockchain - Where Blockchains Add Substance - Determining your needs - Defining your goal - Choosing a Solution - Drawing a blockchain decision tree - Making a plan.	15
Unit II	Cryptography: Types of Cryptography - Use of Cryptography in Blockchain - Hash function, Digital Signature - ECDSA, Memory Hard Algorithm, Zero Knowledge Proof.	15
Unit III	Basic Distributed Computing & Crypto primitives: Atomic Broadcast, Consensus, Byzantine Models of fault-tolerance, Hash functions, Puzzle friendly Hash, Collision resistant hash, digital signatures, public key crypto, verifiable random functions, Zero-knowledge systems.	15
Unit IV	Getting Your Hands on Blockchain - Diving into the Bitcoin Blockchain - Creating your first Bitcoin wallet - Creating a second Bitcoin wallet - Generating a Bitcoin vanity address - Transferring your vanity address - Making an entry into the Bitcoin blockchain - Reading a blockchain entry in Bitcoin - Using Smart Contracts with Bitcoin - Checking the status of your contract.	15
Unit V	Encountering the Ethereum Blockchain - Exploring the Brief History of Ethereum - Ethereum: The Open-Source World Wide Computer - Decentralized applications: Welcome to the future - The power of decentralized autonomous organizations - Hacking a Blockchain - Understanding smart contracts - Discovering the crypto currency Ether - Getting Up and Running on Ethereum - Mining for ether - Setting up your Ethereum wallet.	15

			CC Lab VII: PHP & MySQL Lab	Semester:	V
Practical Hrs./Week	5	Practical Hrs./Sem.	-	Credits:	2

Course Objective

To learn about creating dynamic webpages using different open source technology like HTML, PHP, MySQL, and Apache.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand HTML tags for designing static pages and separate design from content using Cascading Style sheet	K1
CO2	Gain knowledge on basic MySQL commands	K2
CO3	Apply MYSQL commands to create and connect PHP application	K4
CO4	Examine basic PHP syntax for variables types, operators and flow controls	K3
CO5	Evaluate application accessing restrictions, logging and monitoring Apache web server activity, optimizing and tuning MySQL	K5

Contents	Hours
Set A - Write a HTML program for Creation of web site with forms, frames, links, tables etc. - Write a web application that functions as a simple hand calculator, but also keeps a paper trail of all your previous work. - Create a web page with appropriate content and insert an image towards the left hand side of the page when user clicks on the image. It should open another web page. - Write a PHP program to check student grade based on the marks using if-else statement. - Write a PHP program to reverse the string. - Write a PHP program to count the words in the string. - Write a PHP program using nested for loop that creates a chess board. - Write a PHP program to find factorial of a number using recursive function. - Write a PHP program for shopping cart. - Write a query to get the first 3 characters of first name from employees table. - Write a query to get unique departmentID from employee table. - Write a query to get the first name, last name who joined in the month of June. Set B - Write a PHP program for students mark list preparation using database Connection. - Write a PHP program to check if a person is eligible to vote or not. - Write a program in PHP to remove specific element by value from an array using PHP program. - Write a simple calculate or program in PHP using switch case - Create a table and implement all DDL Commands and all DML Commands. - Write a SQL statement to create a table named jobs including columns job_id, job title, max_salary, min_salary and check whether the max_salary amount exceeding the upper limit 25000.	75

	• Write a SQL statement to create a table named countries including columns country_id, country_name and region_id and make sure that the country_id column will be a key field which will not contain any duplicate data at the time of insertion. • Write a SQL statement to increase the minimum and maximum salary of PU_CLERK by 2000 as well as the salary for those employees by 20% and commission percent by 10. • Create salesman table with fields like salesman_id, name, city, commission and create customer table with column names like customer_id, cust_name, city, grade, salesman_id. Write a SQL statement to prepare a list with salesman name, customer name and their cities for the salesmen and customer who belongs to the same city. • Create salesman table with fields like salesman_id, name, city, commission and create customer table with column names like customer_id, cust_name, city, grade, salesman_id. Write a SQL statement to know which sales man are working for which customer. • Create a MySQL database for electricity bill processing. • Create salesman table with fields like salesman_id, name, city, commission and create customer table with column names like customer_id, cust_name, city, grade, salesman_id. Write a query to display all salesmen and customer located in London. INTERNAL MARK(20 Marks) EXTERNAL MARK(30 Marks)

Hrs/Week:	4	Tutorial Hrs./Sem	-	SEC III: Programming Lab using .NET	Semester:	V
					Credits:	2

Course Objective

This Lab course will help students to achieve the following objectives:

- Introduce to .Net IDE Component Framework.
- Programming concepts in .Net Framework.
- Creating website using ASP.Net Controls.

Course Outcomes

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To Create user interactive web pages using ASP.Net. K3 CO2 K4 CO3 K5	K3
CO2	To Create simple data binding applications using ADO.Net connectivity	K4
CO3	Performing Database operations for Windows Form and web applications.	K5

SET A	Total Hours
• Develop a project for performing arithmetic, relational and logical operators. • Develop a project for demonstrating polymorphism abstraction • Develop a project for demonstrating switch statements. • Create a form that is the main window of a program using window class. • Develop an application which is similar to notepad using menus. • Develop an application for facilitating purchasing order. • Develop an application which is similar to login form. • Develop an application using tree view control • Develop an application using font dialog control. • Develop an application using color dialog control. • Develop an application to display the file selected by the user in a web browser control	
SET B	
• Create a form which displays the given inputs in the form of a tree-view Structure. • Develop a project for implementing exception handling in c#. • Develop an application for billing system in coffee shop • Develop an application for fruits billing • Develop an application using the data reader to read from a database. • Develop a project which displays the student information in the relevant fields from the database which already exists. • Design an application with simple bulleted list control. • Design an application for selecting a single day in the calendar control. • Design an application by using the new scroll bar feature with the panel server control.	60

Course Objective

This course gives students an insight into the basics of cloud computing along with virtualization, cloud computing is one of the fastest growing domain from a while now. It will provide the students basic understanding about cloud and virtualization along with it how one can migrate over it.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand basics of cloud computing along with virtualization	K3
CO2	Knowledge on cloud computing for community	K4
CO3	Understand and apply various collaboration on project management	K3
CO4	Evaluating web mail services and web conference tools	K4,K5
CO5	Exploring on line photo editing applications, exploring photo sharing communities	K4, K6

Units	Content
Unit I	Introduction: Cloud Computing: Introduction, From, Collaboration to cloud, working of cloud computing, pros and cons, benefits, developing cloud computing services, Cloud service development, discovering cloud services.
Unit II	Cloud Computing For Everyone: Centralizing email communications, cloud computing for community, collaborating on schedules, collaborating on group projects and events, cloud computing for corporation, mapping, schedules, managing projects, presenting on road.
Unit III	Using Cloud Services: Collaborating on calendars, Schedules and task management, exploring on line scheduling and planning, collaborating on event management, collaborating on contact management, collaborating on project management, collaborating on word processing, spreadsheets, and databases.
Unit IV	Outside The Cloud: Evaluating web mail services, Evaluating instant messaging, Evaluating web conference tools, creating groups on social networks, Evaluating on line groupware, collaborating via blogs and wikis.
Unit V	Storing and Sharing: Understanding cloud storage, evaluating on line file storage, exploring on line book marking services, exploring on line photo editing applications, exploring photo sharing communities, controlling it with web based desktops.
	Self Study Paper

					Credits:	4	

Course Objective

This course is laid to master techniques like data exploration, data visualization, and predictive analytics and descriptive analytics with the help of R language.

Course Outcomes (CO)

On the successful completion of the course, students will be able

CO Number	CO Statement	Knowledge Level
CO1	To remember the core to provide a conceptual understanding of the basics of R programming	K1
CO2	To understand the common programming Variable classes, Data frames and lists	K2
CO3	To deploy the concepts of Reading, creating and storing R -CSV file	K3
CO4	To figure out appropriate statistical tests using R	K4
CO5	To describe the various data visualization methods.	K5

Hrs/Week:	4&2	Tutorial Hrs./Sem.	-	DSE II: Web Development Essentials with Angular, React and Node.js	Semester:	VI
					Credits:	5

Course Objective

Upon successful completion of this course, students will be able to develop real-world applications using Angular, Node.js, and React. They will understand the theoretical and practical aspects of full-stack web development, create dynamic single-page applications with AngularJS, manage server-side development with Node.js, and build component-based interfaces with React.js. This course equips students with the essential skills to build robust and scalable web applications.

CO Number	CO Statement	Knowledge Level
CO1	Understand the foundational concepts of AngularJS, including its MVC architecture and the creation of Single Page Applications (SPA)	K2
CO2	Apply and manipulate AngularJS core features such as ng attributes, data binding, directives, and modules to develop dynamic web applications	K3, K4
CO3	Construct and implement advanced AngularJS functionalities, including custom filters, form handling, and Ajax calls using the \$http service	K3, K5
CO4	Demonstrate proficiency in Node.js by setting up the development environment, utilizing core modules, and creating web servers to handle HTTP requests	K1, K3
CO5	Develop and manage React applications, including setting up projects, creating and optimizing components, and understanding advanced features such as Next.js and Concurrent Mode	K3, K5

Syllabus

Units	CONTENTS	Hours
Unit I	Introduction to AngularJS: Overview of AngularJS - Advantages of AngularJS - Understanding the AngularJS MVC Architecture - Introduction to Single Page Applications (SPA) - Setting Up the Environment: Installing AngularJS -Creating the first AngularJS application using MVC architecture - Core AngularJS Concepts: Understanding ng attributes - Expressions and Data Binding - Working with Directives - Angular Modules, Controllers, Scope, and View - Creating Controllers and Modules - Understanding Scope hierarchy.	18
Unit II	Filters and Forms: Built-in filters: uppercase, lowercase, date, currency, number formatting, orderBy, filter - Creating custom filters - AngularJS Forms: Working with AngularJS forms - Model binding and form controller - Using CSS classes and form events - Custom model update triggers - Custom validation - Ajax with AngularJS: \$http service - Ajax implementation using \$http.	18
Unit III	Introduction to Node.js: Overview and features of Node.js - Setting up the development environment: Installing Node.js - Working with REPL and Node.js Console - Node.js Core Concepts: Understanding Node.js Modules - Node Package Manager (NPM) - Node.js Basics - File System operations - HTTP and HTTPS modules - Creating a web server - Handling HTTP requests - Node.js Callbacks and Events.	18
Unit IV	Introduction to React.js: Overview and features of React - Understanding the component-based architecture of React - Declarative nature of React - Quick JavaScript version overview: Classes and Closures - Setting Up React: Structure and objectives of a React project - Choosing a text editor - Setting up Node.js and NPM for React development - Setting up React projects - Introduction to JSX - Moving to TypeScript.	18
Unit V	React Components: Structure and objectives of React components - Class vs Functional components - Lifecycle management in React - Introduction to Next.js: Overview of Next.js and its features - Installation and setup of Next.js - Next.js default pages and routing - Working with Next.js components - Importance of CSS files in Next.js - Bleeding Edge React: How React works - Introduction to Concurrent Mode - Opting into Concurrent Mode - Suspense for code fetching and data fetching.	18
	Total Hours (60 Lecture + 30 Lab)	90

Lecture Hrs./Week & Practical Hrs./Week	4&2	Tutorial Hrs./Sem	-	DSE II: Mongo DB	Semester:	VI
					Credits:	5

Course Objective

To understand fundamentals of NoSQL and apply MongoDB (NoSQL) for Data Analysis using CURD and User Management.

Course Outcomes

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand NoSQL database Design multiple tables, and using group queries.	K3
CO2	Design a database based on a data model normalization to a specified level	K4
CO3	Understand and apply various operators and queries in Mongo DB	K3
CO4	Develop a text processing skill set and able to apply in creation of	K4,K5
CO5	Design a secure database and analyze with security protocols	K4, K6

Units	Content	Hrs
Unit I	NoSQL : Indexing and Hashing – Query Processing – Transaction Processing – Concurrency Control and Recovery + Advanced Database Concepts and Emerging Applications: Distributed Databases – Object Oriented Databases – Object Relational Databases- Data mining and Data Warehousing – Big Data + Big Databases- SQL-NoSQL Tradeoffs-CAP Theorem-Eventual Consistency + NoSQL-database types- Document Oriented – Columnar – Graph – Key-Value Pair + NoSQL database, design for performance / quality parameters, documents and information retrieval.	18
Unit II	MongoDB Introduction : MongoDB- Introduction - MongoDB – Need – MongoDBVs RDBMS – MongoDB- Driver Installation – Configuration – Import and Export – MongoDB Server Configuration - Data Extraction Fundamentals - Intro to Tabular Formats - Parsing CSV -Parsing XLS with XLRD- Parsing XML + Intro to JSON -Getting Data into MongoDB - MongoDB-CURD – Database Creation – Update – Read – Delete	18
Unit III	MongoDB Operators : Using mongoimport -Operators like \$gt, \$lt, \$exists, \$regex -Querying Arrays and using \$in and \$all Operators -Changing entries: \$update, \$set, \$unset - Data Analysis - Field Queries - Projection Queries- Limiting – Sorting -Aggregation - Examples of Aggregation Framework - The Aggregation Pipeline - Aggregation Operators: \$match, \$project, \$unwind, \$group	18
Unit IV	Indexes and Advanced MongoDB : Indexes – Create – Find – Drop – Backup – MongoDB – Relationships – Analyzing Queries – MongoDB Objectid MapReduce – MongoDB - Text Processing - Regular Expression – Case Studies – Text processing of large datasets, Map-Reduce using MongoDB - Data Security – Performance – Data Safety – Resource Utility – High – Advanced MongoDB: Map Reduce– MongoDB - Text Processing	18
Unit V	Contemporary Issues : Availability User Management – MongoDB Data Replication in Servers – Data Sharding – MongoDB Data Security – Performance – Data Safety – Resource Utility – High Availability Expert lectures, online seminars - webinars	18
	Total Contact Hrs (60 Lecture + 30 Lab)	90

Pedagogy and Assessment Methods:

Direct Instruction, Digital Presentation, Digital Assignments, Online Quiz, Group Talk(APS)

Lecture Hrs/Week:	4&2	Tutorial Hrs./ Sem.	-	DSE-III: – Robotic Process Automation	Credits:	5

Course Objective

On successful completion of the course the students are able to understand the concepts of RPA represent a transformative approach to streamline and automate business processes. By employing software robots or "bots," RPA technology can mimic human actions to execute repetitive and mundane tasks, significantly enhancing operational efficiency, accuracy, and productivity.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Describe RPA, where it can be applied and how it's implemented	K1
CO2	Describe the different types of variables, Control Flow and data manipulation techniques	K2
CO3	Identify and understand litnape, Text and Data Tables Automation	K3
CO4	Describe how to handle the User Events and various types of Exceptions and strategies.	K4
CO5	Understand the Deployment of the Robot and to maintain the connection	K5

Syllabus

Units	Contents	Hrs
Unit I	Introduction to Robotic Process Automation: Scope and techniques of automation, Robotic process automation - What can RPA do?, Benefits of RPA, Components of RPA, RPA platforms, The future of automation, RPA BASICS: History of Automation - What is RPA - RPA vs Automation - Processes & Flowcharts - Programming Constructs in RPA - What Processes can be Automated - Types of Bots - Workloads which can be automated - RPA Advanced Concepts - Standardization of processes - RPA Development methodologies - Difference from SDLC - Robotic control flow architecture - RPA business	18

	case - RPA Team - Process Design Document/Solution Design Document - Industries best suited for RPA - Risks & Challenges with RPA - RPA and emerging ecosystem.	
Unit II	RPA Tool Introduction and Basics: Introduction to RPA Tool - The User Interface - Variables - Managing Variables - Naming Best Practices - The Variables Panel - Generic Value Variables - Text Variables - True or False Variables - Number Variables - Array Variables - Date and Time Variables - Data Table Variables - Managing Arguments - Naming Best Practices - The Arguments Panel - Using Arguments - About Imported Namespaces - Importing New Namespaces - Control Flow - Control Flow Introduction - If Else Statements - Loops - Advanced Control Flow - Sequences - Flowcharts - About Control Flow - Control Flow Activities - The Assign Activity - The Delay Activity - The Do While Activity - The If Activity - The Switch Activity - The While Activity - The For Each Activity - The Break Activity - Data Manipulation - Data Manipulation Introduction - Scalar variables, collections and Tables - Text Manipulation - Data Manipulation - Gathering and Assembling Data.	18
Unit III	Advanced Automation Concepts & Techniques: Recording Introduction - Basic and Desktop Recording - Web Recording - Input/Output Methods - Screen Scraping - Data Scraping - Scraping advanced techniques - Selectors - Defining and Assessing Selectors - Customization - Debugging - Dynamic Selectors - Partial Selectors - RPA Challenge - Image, Text & Advanced Citrix Automation - Introduction to Image & Text Automation - Image based automation - Keyboard based automation - Information Retrieval - Advanced Citrix Automation challenges - Best Practices - Using tab for Images - Starting Apps - Excel Data Tables & PDF - Data Tables in RPA - Excel and Data Table basics - Data Manipulation in excel - Extracting	18
Unit IV	Handling User Events & Assistant Bots, Exception Handling: Introduction to assistant bots - Monitoring system event triggers - Hotkey trigger - Mouse trigger - System trigger - Monitoring image and element triggers - An example of monitoring email - Example of monitoring a copying event and blocking it - Launching an assistant bot on a keyboard event. Exception Handling: Debugging and Exception Handling - Debugging Tools - Strategies for solving issues - Catching errors.	18
Unit V	Deploying and Maintaining the BOT: Publishing using publish utility - Creation of Server - Using Server to control the bots - Creating a provision Robot from the Server - Connecting a Robot to Server - Deploy the Robot to Server - Publishing and managing updates - Managing packages - Uploading packages - Deleting packages.	18
	Total Contact Hrs (60 Lecture + 30 Lab)	90

Pedagogy and Assessment Methods:

Direct Instruction, Digital Presentation, Digital Assignments, Online Quiz, Group Talk(APS)

					Credits:	5

Course Objective

On successful completion of the course the students are able to understand the concepts of problem solving logics, reasoning knowledge, Decision making, Learning with searches and algorithms.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember the concepts of basic web designing languages.	K1
CO2	Understand the idea of designing and scripting web pages.	K2
CO3	Apply Queries using categorization and clustering.	K3
CO4	Analyze the validation and querying techniques using Javascript and JQuery.	K4
CO5	Evaluate the web forms for different applications.	K5

				Analytics	Credits:	5

Course Objective

On successful completion of course students will possess the skills necessary for utilizing tools (including deploying them on Hadoop/MapReduce) to handle a variety of big data analytics, and to be able to apply the analytics techniques on a variety of applications.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Remember how to collect, manage, store, query, and analyze various forms of big data	K1
CO2	Understand the concept and challenge of big data and why existing technology is inadequate to analyze the big data	K2
CO3	Deploy use of Big Data to deliver business value	K3
CO4	Analyze un-modeled, multi-structured data using Hadoop, MapReduce.	K4
CO5	Validate the novel architectures and platforms introduced for Big data, in particular Hadoop and MapReduce.	K5

COMPUTER SCIENCE PROJECT AND VIVA VOCE

Guidelines

Introduction

The title of the project work and the organization will be finalized at the end of fifth semester. Each student will be assigned with a Faculty for guidance. The Project work and coding will be carried by using the facility of computer science lab as well as in the organization. Periodical review will be conducted to monitor the progress of the project work. Project report will be prepared and submitted at the end of the semester. External examiner appointed by the Controller of Examination will conduct the viva voce examination along with respective guide.

Area of Work

- Web Based Development
- Mobile app development
- Website development
- IoT Projects
- Big Data and Data Mining Projects
- Cloud Computing Projects
- Networking Projects
- Artificial Intelligence and Machine learning Projects
- Data Analytics Projects using Python, R, Tableau, etc.
- Web Security Projects
- Image Processing

Methodology Arrangement of Contents:

The sequence in which the project report materials should be arranged and bound as follows:

1. Cover Page & Title Page
2. Bonafide Certificates
3. Declaration
4. Acknowledgement
5. Synopsis
6. Table of Contents
7. Chapters
8. Appendix
9. References

Format of Table of Contents**TABLE OF CONTENTS**

Chapter No.	Title	Page No.
i	Certificates	
ii	Declaration	
iii	Acknowledgement	
iv	Synopsis	
1.	Introduction	
	1.1 Introduction	
	1.2 Objective of the Project

Course Code:	25UCS6S1	Course Title:	Batch:	2025-2028
Practical Hrs./Week	7	Tutorial Hrs./Sem	Semester:	VI
			Credits:	2
			SEC IV: Naam Mudhalvan: Data Visualization using Tableau Lab	

Course Objective

The main objectives of this Lab are

- To understand the concept of Tableau
- To become familiar with the Work Sheets and Time Series
- To provide hands on experience with Tableau.
- To familiarize students with Various BI Dashboards

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Connect data source using Tableau.	K3
CO2	Implement Maps and Scatter plots.	K4
CO3	Apply appropriate data sets for visualization	K5

Mapping

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PSO1	PSO2
CO1	H	H	H	H	M	H	M	H	M	H	H	H
CO2	H	H	H	H	M	H	M	M	M	M	M	H
CO3	H	H	M	M	M	H	H	H	M	M	H	H

H - High; M-Medium; L-Low

Content	Hours
- Connecting to a data source and joining related data sources in Tableau - Visualization concept using Show Me. - Adding, duplicating, and renaming, reordering, clearing, and deleting on worksheets. - Time series, Aggregation and Filters for Unemployment Data Statistics. - Maps and Scatter plots for a sample Dataset. - Table calculations, Dashboard and Storytelling using Customer Data Set. - Import the legacy data from different sources such as (Excel, SQL, Server, Oracle etc.) and load in the target system. - Reporting/Dash boarding using powerBI. - Publishing Power BI Dashboards. - Data relationships and queries in PowerBI	45
Total Contact Hrs	45

Pedagogy and Assessment Methods:

Direct Instruction, Digital Presentation, Digital Assignments

Lecture Hrs./Week or Practical Hrs./Week	3	Tutorial Hrs./Sem.	-	SEC IV: Naan Mudhalvan; Generative AI Lab	Semester:	VI
					Credits:	2

Course Objective

On successful completion of the course aims to provide students with a comprehensive understanding of AI models that generate text, images.

Course Outcomes (CO)

On the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Apply fundamental concepts of Generative AI to develop AI-driven content generation models	K3
CO2	Analyze different Generative AI models and compare their performance in text, image, and video generation	K4
CO3	Evaluate the effectiveness of AI-generated outputs based on quality, realism, and human perception metrics	K5

Mapping

Syllabus

Contents	Hrs
SET A - Generate a short story or poem based on a given prompt using ChatGPT - Generate a Python program that sorts a list of numbers using AI assistance - Generate an AI-created image from a text prompt using DALL-E - Generate a Python program that sorts a list of numbers using AI assistance using GitHub Copilot	45

Train a simple chatbot that answers questions on a specific topic	
SET B	
- Generate an AI-composed music track based on a genre - Train an AI model to detect fake news based on text input - Generate an AI-powered personalized email response - Use AI to create realistic character dialogues for a game - Use AI to draft a professional email	
EXTERNAL MARK (50 Marks)	
Total Contact Hrs	45

Pedagogy and Assessment Methods:

Direct Instruction, Digital Presentation, Digital Assignments

Hrs/Week:	Tutorial Hrs./Sem	-	Semester:	VI
		ALC-II: Augmented Reality, Virtual Reality (AR/VR)	Credits:	2**

Course Objective

This course provides a fundamental understanding of Augmented Reality (AR) and Virtual Reality (VR), covering their concepts, tools, sensor devices, modeling techniques, and application development. Students will gain hands-on experience in designing and developing AR/VR applications for various domains.

Course Outcomes:

CO Number	CO Statement	Knowledge Level
CO1	Remember the core concepts of Virtual Reality and Augmented Reality, their differences, and their key components.	K1
CO2	Understand the VR and AR modeling techniques, including geometric, kinematics, and behavior modeling.	K2
CO3	Implement basic VR and AR applications using appropriate software tools and frameworks.	K3
CO4	Evaluate interaction techniques in VR and AR environments for better user experience.	K4
CO5	Develop AR/VR applications in different domains	K5

Mapping

H: High, M: Medium, L: Low

UNITS	CONTENTS
Unit I	INTRODUCTION TO VR & AR - Virtual Reality (VR): Definition, Three I's of VR, VR vs 3D Computer Graphics, Components of a VR System - Augmented Reality (AR): Definition, AR Technologies, AR vs VR, Introduction to Trajectories & Hybrid Space - Input Devices: 3D Position Trackers, Types of Trackers, Gesture-Based Interfaces, Navigation Interfaces - Output Devices: Graphics Displays, Human Visual System, Personal & Large Volume Displays, Sound Displays.
Unit II	MODELING IN VR & AR - Geometric Modeling: Object Shape, Appearance, and Transformations- Kinematics Modeling: Object Position, Motion, Transformation Matrices - Physical Modeling: Collision Detection, Surface Deformation, Force Computation - Behavior Modeling: Object Interaction & Response to Environment - Model Management: Handling Multiple Objects & Scenes.
Unit III	VR & AR PROGRAMMING FUNDAMENTALS - VR Programming Basics: Toolkits & Scene Graphs - Basic VR Software Frameworks: World ToolKit, Java 3D (Overview) - AR Software Development: Camera Parameters, Camera Calibration, Marker-Based AR - Developing Simple VR & AR Applications: Using Basic Tools.
Unit IV	INTERACTION IN VR & AR ENVIRONMENTS - Motor Programs & Remapping in VR - Locomotion & Manipulation in VR & AR - Social Interaction in Virtual Spaces - Visualization Techniques for AR - Enhancing Interactivity in AR Environments.
Unit V	APPLICATIONS OF AR & VR - Education, Training & Simulation - Medical & Healthcare Applications - Entertainment & Gaming - Business & Industrial Applications - Emerging Trends in AR & VR.
Total Hours (Self Study Paper)	

Pedagogy and Assessment Methods:

Seminar, Power Point Presentation, Chalk and Talk, Quiz, Assignments, Group Task
